

GTL3 - GERMICIDAL LAMPS

Low Pressure mercury lamps
Emitting shortwave UV

E-17 Base
Replaces #GS411N Lamp

Watts	M.O.L	AMPS	LIFE HOURS	FILAMENT	INTERMEDIATE SCREW BASE
3	2.5"	0.350	3,000	CC-2V (Inverted)	GTL3

Applications:

Germicidal lamps are used for killing and inactivating bacteria, viruses and other primitive organisms. Common uses are:

- Treatment of air in hospitals and air conditioning systems
- Disinfection of drinking water and waste water
- Disinfection of packing materials, bottles and jars in the food processing industries
- Various photo-chemical process

WARNING: The radiation emitted by these lamps is extremely harmful to all living organisms. Special measures should therefore be taken to protect against direct radiation.
